ORDERING PROCEDURES

How To Use The Panel Systems Binder

The Abex Panel Systems binder is designed to make selling and ordering Abex Panel Systems exhibits quick and easy. A review of the main Table of Contents will help to familiarize you with the binder layout. The binder is divided into three main sections;

- **Abex 900 Custom Modular System**
- **Abex 600 MultiConnect Panel System**
- **Abex 500 QuickConnect Panel System**

Each main section includes five sub-tabs:

Packages, Components, Counters, Accessories and Design Ideas

Each page of the Package Section serves as a Quote/Order form which may be copied and faxed directly to Abex. The following is a review of each section. Watch for bold, italicized words in the following overview for discount information.

Packages:

In this section each basic package includes a brief description including casing requirements and approximate weights. The part numbers and prices are broken down into the individual components included in the package as well as several blank lines to fill in your own additions. Space is also provided in the upper left hand corner of each page to note fabric/laminate colors, add the salesperson's code and lead number. Please call out the colors specs on the line drawing as well as the fabric laminate color key. Please refer to the Reference section for fabric and laminate standard selections.

Quickship

These packages are shown with the 

logo noted on each applicable package in the top left corner. These units can ship in 48 hours.

Value Added Packages

The back of the Abex 600 MultiConnect package section provides a "Value Added " 1010P package. Order this package exactly as shown and receive a 15% discount off the list price of the accessories, including: header, diffuser, RPC countertop and base, keyboard shelf and the radius sconce! The savings are substantial.

ORDERING PROCEDURES

Lead Times

Abex Display Systems Production Lead-Times

The following is a list of our production lead-times for each product line. All orders must be received complete by 12:00 p.m. Pacific Standard Time to be processed that business day. Production time begins the day after the order is received. For custom units, production time does not begin until the design is complete and the Abex quote is signed by the distributor.

600 MultiConnect

- Stock parts — 2 business days (minimum)
- Quickship — 2 business days
- Stock packages — 10 business days
- Custom and modified stock units — 15 business days (minimum)

500 QuickConnect

- Stock parts — 2 business days (minimum)
- Quickship — 2 business days
- Stock packages — 10 business days

900 Custom Modular System

- Lead times are established on a per order basis, depending on how custom the unit is and the availability of the laminate chosen. Custom elements always add one week to the lead time. There is always a three week minimum lead time. **Production starts when all appropriate paperwork is turned into Customer Service**.

All of the above are standard lead-times. These may vary due to large volume orders and other variables. Watch for Abex Production Updates for extended lead-times. Lead times can be as much as four weeks for standard and six weeks for custom. Customer Service can always provide immediate information on lead times.

Rush Charges

Rush charges are applied when a customer requests an item in less than standard lead-time. In order to compensate for overtime in our administrative and production areas, a rush charge of 3% of list has been established. The rush charge will be assessed only on custom items which are to be produced in a shorter period than the published lead times.

Quickship Units

The following is a list of all the Quickship items. “Quickships” are units that we keep on the shelf, which must ship as complete units. These particular units require 48 hour lead-times. These units are marked with the 

in our Package Section for easy identification.

ORDERING PROCEDURES

Ordering Checklist

The following list contains the most common omissions received at Abex. Please be sure to include all of this information before you place an order. This will assist us in processing your order faster and more accurately.

- ☐ Have you clearly marked which product line you need?
- ☐ Have you listed all appropriate part numbers and prices?
- ☐ Have you listed the ship date, and ship to address?
- ☐ Are there appropriate call out drawings with the order?
- ☐ Have you listed all appropriate laminate and fabric colors, manufacturers' names, part numbers and finishes on your order?
- ☐ Have you listed all sizes, dimension locations and colors of panel accessories (i.e. slatwall, lightboxes, grommets, inlays, monitor cut-outs and stands)?
- ☐ Have you clearly marked any non-Abex items to be used in the design?
- ☐ Have you noted shipping containers and packing instructions?
- ☐ Have you noted the freight account number if freight charges are billed to the customer?
- ☐ Do you have a signed copy of the finalized quote and drawings with the purchase order (applies only if placing modified stock or custom orders)?
- ☐ Is there included a call out drawing or call out binder picture of the modified stock unit?
- ☐ Is the individual sales code included on the purchase order?
- ☐ Is sales tax required?
- ☐ Do you have the correct shipping code?
- ☐ Is there a purchase order number?
- ☐ Have you included your lead number and Salesperson's code?

If you have answered YES to all of the above questions, please fax your order and all appropriate paperwork to (818) 503-2769.

ORDERING PROCEDURES

Helpful Hints

600 MultiConnect

- If your order has an inlay, have you shown all specs (height, distance from top and bottom of panel)? Is the inlay on one side or both sides of the panel? Inlays on an RDC should always be done on both sides for visual inlay continuity.
- When using slatwall and lightboxes, remember snaptrack color (black or grey).
- When a monitor is called out in your order, a completely filled out Abex monitor spec form is always required with your order. We can not process your order without this form.
- Horizontal inlays are $22.00 per seam, per side, vertical inlays are $40.00 per seam and diagonal inlays are $48.00 per seam. Custom inlays are quoted by the design department.
- U and H clips system connections, cannot be located next to a panel with recessed shelf standards (RSS).

500 QuickConnect

- Rear-mount brackets for alcove and radius peninsula counters are always used in QuickConnect.
- The cut-out slots for the counters are made in the lower level panels. Note: the panels are automatically dedicated and can only be used with counters, unless a graphic covers the counter bracket slots when the counter is not used.

900 Custom Modular System

- All Abex 900 orders must be accompanied by your purchase order, a signed Abex final quote and a detailed drawing that lists laminate manufacturer, color, finish, part number and laminate location by level.
- Laminate specs must be shown using the coding system on the Abex quote drawing for accuracy and clarity. Neatness is essential.
- Remember to specify all colors on all locations.
- Laminate availability can change daily. Always be prepared to select an alternative in the event that your laminate selection is unavailable.

QUOTING PROCEDURES

Abex 900 Custom Modular System

A signed and approved quote from the Abex Design department is required for all Abex 900 orders. The "Package" and "Design Ideas" sections of this binder contain a number of exhibit designs in island and linear configurations that have already been quoted. To order one of these designs, indicate on the drawing which laminates are to be used and where, and fax this information to Abex Design. Abex will check laminate cost and availability, and fax you back a finalized quote ready for your signed approval. Be sure to specify the laminate manufacturer, name, part number and finish for the fastest response.

Modified and Custom Abex 900 Designs

Should you wish to modify one of the package designs, or send in a design of your own, Abex will use your information to create a new 3-D drawing and plan view with dimensions, along with a detailed quote for the exhibit. Amounts quoted by Abex assume standard laminates are being used unless otherwise specified.

Abex "standard" laminates include the following: Wilsonart, Pionite or Formica laminates in solid colors with matte or gloss finishes. "Gloss" does not include the more expensive "mirror" or "lacquer-type" finishes.

Abex 600 MultiConnect

Package Exhibits

Abex 600 MultiConnect binder pages are designed so that they can be used as order forms for quick and easy order placement. Simply copy the package page, write in your backwall fabric choices and countertop laminate selections, and indicate any other accessories that need to be added to the exhibit. Add up your total in the space provided, and fax to Abex Sales Support. Use the monitor cutout forms and backwall templates found in the "Ordering" section of this binder to provide detailed panel modification instructions. Simple additions like slatwall, monitor cutouts and lightboxes do not need to be quoted through Design. See the back of this section for a sample of a Abex 600 order form write-up.

Abex 600 Exhibits

Should you wish to modify one of the package designs, or create a design of your own, fax your information directly to Abex Design. Abex will use your information to create a new 3-D drawing and plan view with dimensions, along with a detailed quote for the exhibit. Orders for custom Abex 600 exhibits and heavily modified package exhibits will require that you sign and approve a quote generated by Abex Design.

Abex 500 QuickConnect

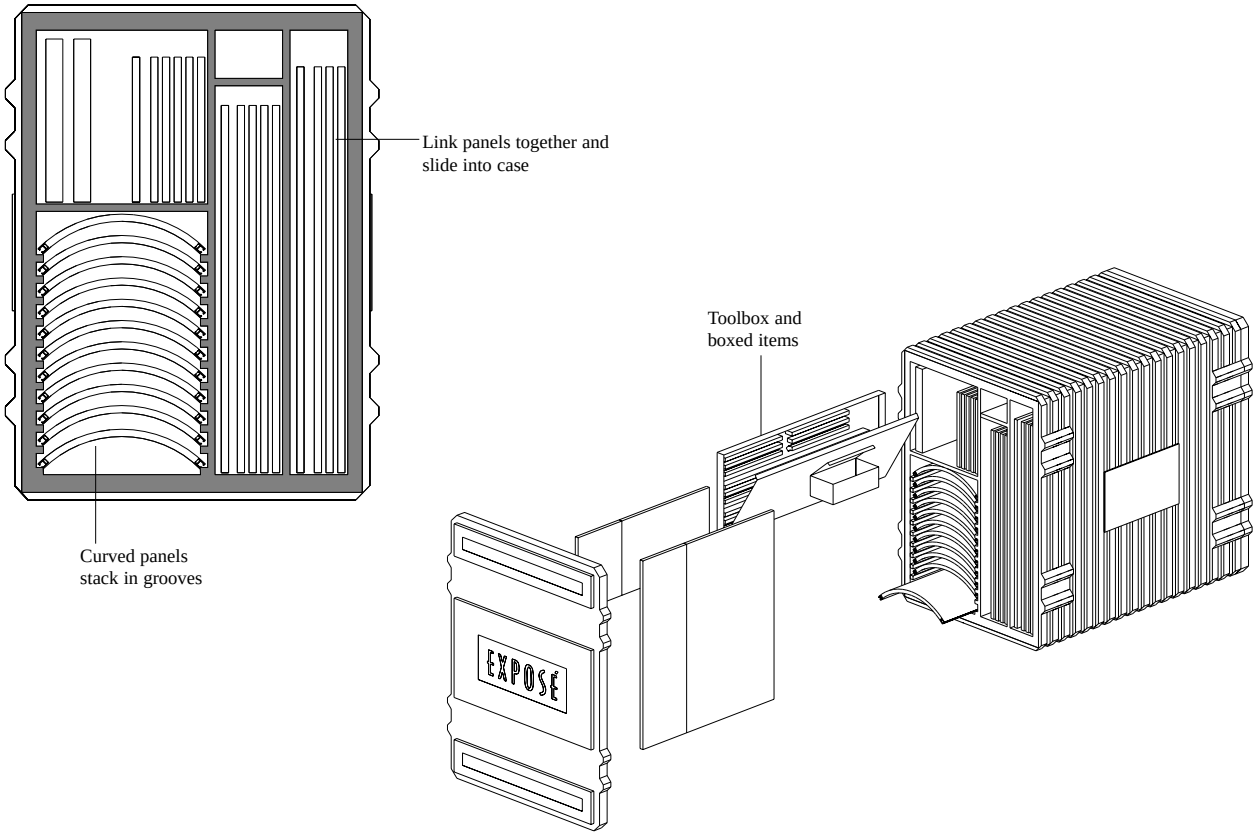

Package Exhibits

Like Abex 600 the Abex 500 binder pages make it easy to order either fabric or laminate QuickConnect package exhibits. A total price is given for each design in fabric and laminate, plus a breakdown of individual components and their prices is also provided, should you want to mix and match laminate with fabric panels. Simply add up the panels, connectors and any accessories needed, specify your fabric and/or laminate choices, and total the price at the bottom of the page. Should your laminate selection be a non-standard laminate (see earlier description), your order will be sent into Abex Design to receive any additional charges required, and you will need to sign and approve the charges prior to placing an order. See the back of this section for a sample of a Abex 500order form write-up.

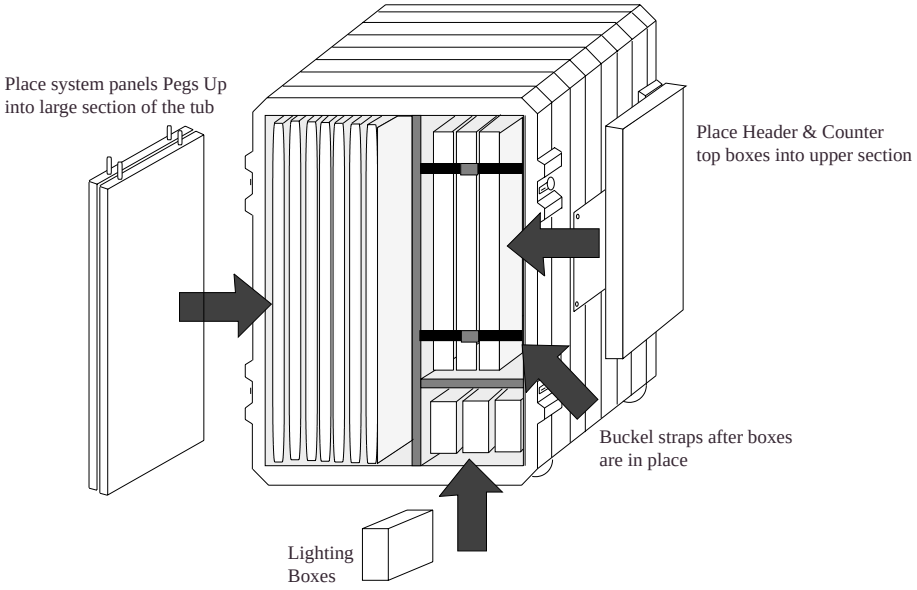

Custom panel sizes and components are not available in Abex 500. Components must be used as shown in the components section of this binder. Minor panel modifications such as slatwall, lightboxes, monitor cutouts and access doors are not considered custom and may be added to Abex 500 package designs without requiring a quote from Abex Design. Should your customer require custom panel sizes and modifications, the exhibit will be quoted in Abex 900.

PACKING

Super Tub Packing for Abex 900 System

Tub Packing Transport for Abex 600 System

SHIPPING

Shipping Containers
Several types of shipping cases are available for **Abex 900, 600 and 500** system components.

PCC Case
The first is a rotationally molded case with built-in, recessed wheels at one end. Handles and hand holds are molded in along one side and both ends. Heavy duty nylon straps are used and are riveted into the cases to insure that they do not break loose in transit. The cases are constructed such that two or more can be “nested” for easy storage. Internal corrugated packaging has been designed to act as filler and to protect lights, header panel sections and countertops. Flat fabric or lamiate panels up to 23.5” wide can ship in the PCC case. The case, fully telescoped can hold up to 12 panels, however, in order to ship UPS, a maximum of 11 panels per case can be packed.

Transport Tub
For larger units and for units with panels larger than 23.5” wide, there is the versatile Transport Tub. It holds the equivalent of four standard Abex 900, 600 and 500 cases and can be modified with vertical and horizontal dividers to accommodate different packing needs. The forklift friendly tub also offers the convenience of loading exhibits while it stands in a vertical position. For added value, a tub conversion is available which converts the tub to a 34” x 58” reception table, with the horizontal dividers acting as shelves.

Super Tub
The Super Tub is an expanded version of the Transport Tub designed to hold the larger Abex 900 panels. At 50% larger, the Super Tub measures 56”H x 40”W x 57”D. Interior packing is custom designed for each order, but can be reconfigured as needed. The Super Tub is forklift-friendly and features the same convenient 360-degree turning casters as the oringinal Transport Tub.

Shipping and Delivery
If an order does not arrive by the due date, please call our offices immediately so that a tracer can be placed.
Freight charges are added at the time of shipping and/or invoicing.

Claims
Ownership passes to the customer upon delivery to the carrier. Merchandise must be checked immediately upon arrival. All claims for damage must be made promptly by the customer to the delivering carrier. Abex is not responsible for damage or shortages that occur in transit. The customer must note any damage or shortage on the carrier’s delivery receipt. Claims must be filed by the customer with the carrier.
Claims against Abex for error, defects, and shortages must be made within two weeks after delivery. Returns will not be accepted without a return authorization number. Authorization will be issued in the form of a number and should be stamped on all cartons returned. All returned merchandise must be in resalable condition if credit is required. All transportation must be prepaid unless authorized to the contrary.

WARRANTY

Product Warranty
Abex Display Systems backs its complete line of Exposé panel systems with warranties that ensure your complete satisfaction.

Abex 900 Custom Modular System
Abex guarantees that the Abex 900 system panels and components will be free from physical defects in materials and workmanship. Abex will repair or replace panels or components that are found to be defective within the first 5 years of being put into service.

Abex 600 MultiConnect
Abex provides a limited lifetime warranty for the Abex 600 panel, which guarantees the structural frame, foam infill, substrate and stainless steel hinges will be free from physical defects in materials and workmanship under normal use as long as you, the original owner, own the exhibit.

Abex 500 QuickConnect
Abex extends a 5-year limited warranty on the Abex 500 system. This warranty guarantees the system panels and components to be free from physical defects in materials and workmanship under normal use. In addition, Abex offers a money-back guarantee on all stock design QuickConnect units ordered in the standard quickship colors: black,silver, charcoal. Ask your sales representative for details.

These warranties specifically exclude damage caused by misuse, modification, accident, fire, water, heat, light, neglect or international damage.

THE ABOVE WARRANTIES ARE EXCLUSIVE. ABEX DISPLAY SYSTEMS MAKES NO OTHER WARRANTIES, ORAL OR WRITTEN, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, CONCERNING THE EXHIBIT. ANY WARRANTIES IMPLIED BY LAW SHALL BE LIMITED TO A PERIOD OF 90 DAYS AFTER ORIGINAL PURCHASE.

WARRANTY

Remedies
In the event of any failure of the enclosed warranties within the specified periods, Abex Display Systems without charge will at its option repair or replace any defective materials. To receive the benefit of these warranties, the purchaser must receive pre-authorization from Abex Display System to return the defective items, submit dated proof of purchase, and return (transportation prepaid) the defective items to Abex Display System with a description of the defect.

THE ABOVE REMEDIES ARE EXCLUSIVE, IN NO EVENT SHALL ABEX DISPLAY SYSTEMS BE LIABLE FOR ANY DIRECT, INDIRECT, SPECIAL OR CONSEQUENTIAL DAMAGES, INCLUDING CLAIMS FOR LOSS OF BUSINESS, USE OR REVENUES, WHETHER ACTION IS BASED ON TORT, CONTRACT, STRICT LIABILITY, OR ANY OTHER THEORY, EVEN IF ABEX DISPLAY SYSTEMS HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN NO EVENT SHALL ABEX DISPLAY SYSTEMS AGGREGATE LIABILITY EXCEED THE PURCHASE PRICE FOR THE EXHIBIT.

Other Rights
The above warranties give the purchaser specific legal rights, and the purchaser may have other rights which vary from state to state. Some states do not allow exclusion or limitation of duration of implied warranties or the exclusion of liability for incidental or consequential damages, so some of the above exclusions and limitations may not apply to the purchaser.

Governing Law
This Warranty is governed by the laws of California, and any litigation conducted with respect to the Warranty shall be conducted in Los Angeles County, California.

NOTE: The above distances will vary approximately 10% with various color combinations.

BURNING
Darkening of a specific area of a print by controlling the exposure to bring out more detail.

COLOR BALANCE
Adjustment of the overall color quality until it is satisfactory.

COLOR CORRECTION
To compensate for the color imbalances of a print or transparency.

COLOR NEGATIVE
Film on which the image is in reverse color. Used to make color prints or transparencies; also black and white prints on Panalure paper.

COPY NEGATIVE OR INTER-NEGATIVE
A negative used to make color prints or transparencies when the original negative or transparency is not available.

CROPPING
Selecting a portion of a negative or transparency to be printed and eliminating the remainder.

DENSITY
A measure of how light or dark a negative print is, due to the exposure time or light intensity during exposure.

DIGPRINT
Abbreviation for Digital Output.

DODGING
Lightening a specified area of a print by holding back the light from the part of the image.

DUPLICATE TRANSPARENCY
Transparencies reproduced from original transparencies.

DURATRANS & DURAFLEX
Media that Abex prints all of its photo material on.

ENLARGEMENT
Reproduction of an image to a larger size than the original.

A positive image on film having a clear background and a solid black image.

FINISHING
The process of spotting, surface enhancement or mounting.

FLOP NEGATIVE
To turn a negative over so the image is reversed from the normal print.

FULL FRAME
The entire image area; no cropping.

HALF TONE
The conversion of continuous tone art into screened art, for use in print reproduction.

INTER-NEGATIVE
A color negative (used for making C prints) made from an original transparency by contact or projection printing.

LINE NEGATIVE
A negative made from line art having no gray tones.

MACHINE PRINT
A print made on a semi-automatic, fixed focus printer on which there is no burning or dodging and limited cropping.

MATTE
Dull or non-glossy finish.

NEGATIVE
A film on which the image is in reverse.

OPAQUEING
The application of a water-based pigment to a negative so that light cannot pass through during the printing process.

POSITIVE
A photographic image in which the tones of the image are the same as the original subject.

PRINT RETOUCHING
Painting on a color print with dyes, watercolors, pencils, etc. to improve the image.

PROOFS
Prints made at the same size as the negative to preview the images for easier selection.

REDUCTION
Reproduction of an image to a smaller size than the original.

SLIDE
A 35mm or 2 1/4 transparency.

SPOTTING
The application of dye to a color print to improve minor blemishes.

TEST STRIP
A print made to test color balance, density or focus before printing.

TRANSPARENCY
A positive-image film viewed by transmitted light.
