ABEX 300 AND 350 SERIES POP-UP DISPLAYS

Nothing sets up easier than a pop-up exhibit from Abex. That is why we've sold tens of thousands over the past 25 years. No one offers higher quality, more frame sizes or case options.

Abex pop-up displays are available in 6 foot, 8 foot, 10 foot, and 20 foot sizes in a wide variety of configurations including straight, curved, wave, gull wing, serpentine, island, U-shaped and more.

Choose from our 4100 interlocking case, our economical 4400 or 4600 all-in-one case, or our deluxe 4300 ultra-wide podium case with lockable storage compartment. Whichever you choose, your exhibit will enjoy the ultimate protection during transit, and its case will transform to a beautiful and functional podium on the show floor.

We manufacture our own cases, hubs, and lights—parts most manufacturers buy from third parties. Then, we back every exhibit with a lifetime limited hardware warranty. We print our graphic panels on state-of-the-art HP printers in-house and assemble every unit for quality control before shipping so you can be assured that everything fits perfectly. We know that when you go to a show the last thing you need to worry about is your exhibit. So next time you need a lightweight, portable exhibit, don't just set up a pop-up—move up to Abex.

QUICK FACTS

All Abex pop-up displays are manufactured in the USA, and each one comes with a limited lifetime warranty on hardware. • Aircraft Grade frame made from 8mm and 13mm aluminum tubing • Magnetic channel bars • Space saving footprint on select models • Over two dozen frame sizes, configurations to choose from • Wide selection of case options • Graphics panels produced in-house to ensure a perfect fit • Over 50 top quality fabric colors to choose from
