

COLORGLO™ RGB LIGHT STRIP INSTALLATION GUIDE

Stand alone control using the IntelliGlo™ 100 Controller.

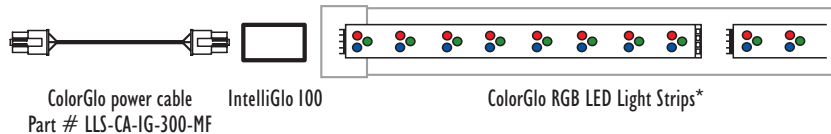

The IntelliGlo 100 is a PCB type RGB color and effects control module that is capable of controlling up to 16 ft. of ColorGlo RGB light strips. The IntelliGlo 100 generates true, infinite, non-repeating random RGB color change.

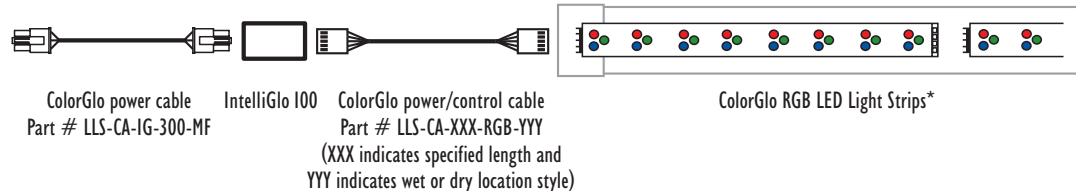

The IntelliGlo 100 may be connected to the IntelliGlo Expansion Module to generate RGB color changing effects to an unlimited number of RGB light strips.

INTELLIGLO 100 PART# LLS-CTRL-100

IntelliGlo 100 Controller mounted directly on RGB light strip inside of polycarbonate tubing. 24VDC 2.5A Max. Input

IntelliGlo 100 Controller mounted in-line between power and power/control cables. 24VDC 2.5A Max. Input

*Connect up to 16 ft. of RGB light strips. See RGB LED Light Strips Installation Guide for install detail.
