IN THE NEW ECHO, BEAUTY IS FOUND IN EVEN THE SMALLEST DETAILS

Frosted plex headers, wings and stand-offs are attached with brushed aluminum fasteners, and provide an elegant backdrop for corporate branding. Your choice of laminates or colored plex are also available.

Echo offers stable, double-beamed construction from  **OCTANORM** that completely blocks the exhibit behind you. Its aluminum frame can support a 32" monitor, yet a 10' system with counters and AIRTUB weighs less than 1200 lbs for reduced freight and drayage. A first in portable modular systems, an optional Abex Colorwave or Color Kinetics programmable light kit allows you to add dramatic, custom lighting effects.
